# INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1982

## A

*Ackerman's Surgical Pathology* (Rosai); (Book review); Jan., 53

activated clotting time; in therapeutic monitoring of heparin; Aug., 35

activated partial thromboplastin time (APTT); in therapeutic monitoring of heparin; Aug., 35

adenosine monophosphate; cyclic (cAMP); urinary levels in cancer and primary hyperparathyroidism; July, 24

adrenocorticotrophic hormone (ACTH); suppression in dexamethasone suppression test; Jan., 19

agar-gel diffusion method; in electron microscopic investigation of viral disease; Nov., 51

alanine aminotransferase; levels of; in blood donors with hepatitis; Aug., 23

alcohol

ethyl; blood- and breath analyses for; March, 43

ethyl; delayed analysis of in intoxication testing; March, 46

ethyl; effects at various concentrations in blood; April, 35

ethyl; effect on gamma glutamyl transferase (GGT) levels; May, 56

ethyl; in vivo testing for; medicolegal aspects; March, 44; April, 36

algorithm

for diagnosis of hepatitis; Aug., 28

in laboratory diagnosis of disease; May, 26

alpha-1-antitrypsin deficiency; assay and phenotype studies in; July, 38

American Association of Blood Banks; role in voluntary inspection of clinical laboratories; Oct., 50

anemia

pernicious; acetylcholinesterase (AChE) levels in; April, 54

pernicious; intrinsic-factor-blocking antibody assay in diagnosis of; Sept., 17

pernicious; vitamin B<sub>12</sub> assay in; Feb., 32

sickle-cell; in infants; use of red-cell inclusions for evaluating splenic function in; Sept., 31

sideroblastic; occurrence of red-cell Heinz bodies in; Sept., 31

antibodies

antinuclear (ANA); assays for in rheumatic disease; March,

25

ferritin-labeled; in electron microscopic investigation of viral disease; Nov., 55

IgG and IgM; enzyme-linked immunoassays for; Nov., 39

monoclonal; in cancer therapy; Feb., 21

monoclonal; potential applicability in diagnostic assays for viral disease; Nov., 66

to creatine kinase (CK) M; as inhibitors of creatine kinase BB antibody; Oct., 33

to hepatitis A virus; Aug., 21

to hepatitis B e-antigen; Aug., 22

to hepatitis B surface antigen (HBsAg); Aug., 21

antibody

anti-IgG; in nephelometric inhibition assays; Sept., 36

decorator; in electron microscopic investigation of viral disease; Nov., 56

IgG; in rubella; enzyme-linked immunoassay for; Nov., 37

IgM; assay methods for; in diagnosis of viral disease; Nov., 64

intrinsic-factor-blocking; in testing for pernicious anemia; Sept., 17

maternal IgG; as defense against neonatal meningitis; Oct., 17

to hepatitis B surface antigen (HBsAg); in radioimmunoassay for HBsAg; Nov., 20

virus-specific IgM; interference in assays for; Nov., 66

anticoagulants; therapeutic monitoring of; Aug., 31

antidepressant drugs; tricyclic; metabolites of; Feb., 47

antigen

hepatitis B core (HBcAg); radioimmunoassays for; Nov., 22

hepatitis B core (HBcAg); serologic testing for; Aug., 21

hepatitis B e; radioimmunoassays for; Nov., 23

hepatitis B e; serologic testing for; Aug., 21

hepatitis B surface (HBsAg); coexisting with antibody; March, 9

hepatitis B surface (HBsAg); radioimmunoassay for; history of; Nov., 19

hepatitis B surface (HBsAg); serologic testing for; Aug., 21

antigen-antibody reactions; recognition with immune electron microscopy; Nov., 51

antigens

HLA; association with pernicious anemia; Sept., 20

viral; methods for rapid recognition of; Nov., 64

antithrombin III; function of; in blood coagulation; Aug., 33

arginine vasopressin; plasma levels in diabetes insipidus; Jan., 25

arthritis; rheumatoid; antinuclear antibody (ANA) assays in; March, 25

assay

adenosine triphosphate (ATP); in diagnosis of asymptomatic bacteriuria; April, 10

bacterial inhibition; in screening of newborns for inborn errors of metabolism; Jan., 30

colorimetric; for cholinesterase enzymes in blood; April, 62

electrometric; for cholinesterase enzymes in blood; April, 61

enzymatic oxidation; for ethyl alcohol in blood; April, 29

enzyme-linked immunosorbent (ELISA); in diagnosis of viral disease; Nov., 66

fluorescent antibody; direct; in diagnosis of viral disease; Nov., 64

gamma glutamyl transferase (GGT); as indicator of liver disease in alcoholism; May, 56

hemagglutination inhibition (HAI); compared with enzyme-linked immunoassay (ELISA) for rubella IgG antibody; Nov., 37

immunochemical; for creatine kinase (CK) MB isoenzyme; procedure; Oct., 34

immunofluorescent; compared with bacterial adsorption test for diagnosis of herpes simplex virus infection; Nov., 60

immunofluorescent; for antinuclear antibodies (ANA) in rheumatic disease; March, 25

immunofluorescent; in antibody-coated bacteria (ACB) test for urinary tract infection; May, 18

latex agglutination; for bacterial meningitis; Oct., 17

Limulus amoebocyte lyase; in diagnosis of asymptomatic bacteriuria; April, 12

Limulus amoebocyte lyase; in diagnosis of bacterial meningitis; Oct., 23

radioenzymatic; for catecholamines in plasma; June, 61

radioenzymatic; for cholinesterase enzymes in blood; April, 60

radioligand; for vitamin B<sub>12</sub>;

Feb., 32

reverse passive hemagglutination (PHA); in diagnosis of viral disease; Nov., 64

solid-phase aggregation of coupled erythrocytes (SPACE); in diagnosis of viral disease; Nov., 64

spectrophotometric; for cholinesterase enzymes in blood; April, 61

urinary cyclic adenosine monophosphate (cAMP); in hypercalcemic syndromes; July, 24

assays

enzymatic; for heparin; in anticoagulant therapy; Aug., 36

enzymatic; for sphingolipid storage diseases; July, 30

nephelometric inhibition; principles and techniques; Sept., 36

*Atlas of Lymph Node Pathology* (Arno); (Book review); Sept., 50

automation

microbiologic; cost of instruments for; March, 39

microbiologic; current status; March, 31

## B

*Bacillus subtilis*

in bacterial inhibition assay for Krebs-cycle enzyme deficiencies in newborns; Jan., 32

in bacterial inhibition assay for phenylketonuria; Jan., 30

bacteria

species of; as agents of meningitis; Oct., 17

in urine; quantitation with antibody-coated bacteria (ACB) test; May, 17

bacteriuria

asymptomatic; screening for; April, 7

automated screening for; March, 39

detection with antibody-coated bacteria (ACB) test; May, 17

Bayesian analysis of laboratory data; May, 24

benzodiazepines; therapeutic monitoring of; Feb., 46

biopsy; bone marrow; plastic embedment techniques; Jan., 40

biotechnology; use of human protein index in; June, 27

biotypes; of *Vibrio cholerae*; identification of; Aug., 46

blind loop syndrome; as a cause of vitamin B<sub>12</sub> malabsorption; Feb., 35

# INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1982

## blood

acetylcholinesterase levels in; assays for; April, 53  
analysis of for alcohol intoxication; March, 43; April, 27  
banking; red-cell rejuvenation in; Oct., 38  
butyrylcholinesterase (BuChE) levels in; assays for; April, 53  
cortisol levels in; in dexamethasone suppression test; April, 45  
glucose levels in; home-monitoring of in diabetes mellitus; May, 53  
lead levels in; federal government criteria for assay of; March, 9  
red cells of; rejuvenation procedures for; Oct., 38  
transfusion; and transmission of hepatitis; Aug., 23  
*Blood and Bone Marrow Morphology* (Frick); (Book review); May, 66  
*Bone Marrow Interpretation* (Kass); (Book review); Jan., 54  
British Standard Thromboplastin (BCT); in prothrombin-time testing; Aug., 41

## C

c-peptide; as indicator of pancreatic insulin production in diagnosis of diabetes mellitus; May, 48  
calcitonin; levels and assay of in thyroid carcinoma and other disease; June, 35  
calcium; metabolism of; in hypercalcemic syndromes; July, 17  
cancer; thyroid; diagnosis with calcitonin assay; June, 35  
carcinoma  
as a cause of hypercalcemia; July, 21  
creatinine kinase (CK) BB isoenzyme levels in; Oct., 31  
thyroid medullary; calcitonin levels in; June, 42  
carnitine deficiency; progress in treatment of; Feb., 16  
catecholamines; plasma levels of; diagnostic use of and factors affecting; June, 53  
catechol-ortho-methyl transferase (COMT); in catecholamine metabolism and assay; June, 62  
cells  
C-; of thyroid gland; hyperplasia of and calcitonin release from in diagnosis of thyroid medullary carcinoma; June, 38  
C-; of thyroid gland; in hypercalcemic syndromes; July, 19

internal control mechanisms of; June, 31  
red blood; rejuvenation of in blood banking; Oct., 38  
red blood; inclusions in and membrane abnormalities of; as indicators of splenic function; Sept., 25  
Centers for Disease Control; role in clinical laboratory inspections; Oct., 47  
centrifugal analyzer  
in analysis of ethyl alcohol in blood; April, 29  
in immunoassay for creatine kinase (CK) MB isoenzyme; Oct., 35  
in rapid therapeutic drug monitoring; March, 59  
cerebrospinal fluid (CSF); testing of; for meningitis; Oct., 17  
cesarean section; and creatinine kinase (CK) MB isoenzyme levels; Oct., 27  
cholera; epidemiology; Aug., 43  
cholinesterase  
acetyl (AChE); assays for in blood; April, 53  
butyryl (BuChE); assays for in blood; April, 53  
chromatography  
gas; for cholinesterase enzymes in blood; April, 62  
gas; for ethyl alcohol concentration in blood specimens; April, 28  
gas-liquid; in therapeutic drug monitoring; March, 59  
gas-liquid; in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 51  
HPLC; in therapeutic drug monitoring; March, 59  
HPLC; in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 51  
citrate-phosphate-dextrose (CPD); as anticoagulant; in red blood cell rejuvenation; Oct., 39  
Clinical Laboratory Improvement Act of 1967; effect on licensing and inspections of clinical laboratories; Oct., 47  
College of American Pathologists; role in inspection and accreditation of clinical laboratories; Oct., 49  
computers  
applications in clinical laboratory medicine; June, 14  
use in patient profiling with serum protein electrophoresis; Aug., 13  
congenital adrenal hyperplasia; neonatal screening for; Jan., 32  
congenital hypothyroidism; neonatal screening for; Jan., 29

coronary artery bypass surgery; and creatine kinase (CK) isoenzyme levels; Oct., 26  
cortisol; plasma; levels of in dexamethasone suppression test for diagnosis of depression; April, 45  
costs  
laboratory; justification of with financial methods; Feb., 23  
of microbiologic media; reduction with laboratory prepared media; Feb., 38  
of radioimmunoassay facilities; laboratory accounting methods for; May, 35  
savings of; with rapid therapeutic drug monitoring system; March, 62  
creatinine kinase (CK) isoenzymes; levels of as indicators of myocardial infarction and other disease; Oct., 25  
culture  
blood; in automated microbiologic testing; March, 33  
media for; for isolation and identification of *Vibrio* species; Aug., 45  
media for; in diagnosis of urinary tract infection; April, 11  
media for; microbiologic; reducing laboratory costs for; Feb., 38  
media for; use in automated microbiologic testing; March, 32  
of cerebrospinal fluid (CSF) in diagnosis of bacterial meningitis; Oct., 18  
tissue; in rapid bacterial adsorption test for herpes simplex virus infection; Nov., 60  
Cushing's syndrome; dexamethasone suppression test in identification of; Jan., 19  
cystic fibrosis  
impaired vitamin B<sub>12</sub> absorption in; Feb., 36  
neonatal screening for; Jan., 34  
cytomegalovirus; electron microscopic recognition of; Nov., 50

## D

data  
in patient profiling with serum protein electrophoresis; Aug., 15  
laboratory; computer handling of; June, 15  
laboratory; new methods for interpreting; May, 23  
decision analysis; in diagnosis and treatment of disease; May, 29  
dehydrogenase; alcohol; in assay for ethyl alcohol in blood;

April, 29  
depression; endogenous; diagnosis with dexamethasone suppression test; Jan., 19; April, 41  
dexamethasone suppression test  
in diagnosis of Cushing's syndrome; Jan., 19  
in psychiatric medicine; Jan., 19; April, 41  
diabetes insipidus; diagnosis of; Jan., 23  
diabetes mellitus; diagnostic and monitoring techniques for; May, 43  
dibucaine number; as indicator of atypical butyrylcholinesterase in blood; April, 55  
2,3-diphosphoglycerate (2,3-DPG); as factor in red blood cell rejuvenation; Oct., 40  
discriminant function analysis; in laboratory diagnosis of disease; May, 26  
disease  
as factor affecting cholinesterase enzyme levels in blood; April, 54  
cardiac; creatinine kinase (CK) isoenzyme patterns in diagnosis of; Oct., 25  
creatinine kinase (CK) isoenzyme levels in various types of; Oct., 31  
Fabry's; diagnosis of; July, 30  
gastrointestinal; caused by *Vibrio* species; Aug., 43  
Gaucher's; diagnosis of; July, 30  
human protein index in diagnosis of; June, 26  
hypercalcemic; July, 17  
infectious; enzyme-linked immunosorbent assay in diagnosis of; Nov., 36  
infectious; white-cell scanning technique in; Feb., 21  
liver; gamma glutamyl transferase (GGT) test for; May, 56  
liver; in alpha-1-antitrypsin deficiency; July, 40  
Niemann-Pick; diagnosis of; July, 30  
Paget's; as cause of hypercalcemia; July, 25  
probability of; as determined with mathematical logic; May, 24  
rheumatic; antinuclear antibody assays in; March, 25  
Tay-Sachs; diagnosis of; July, 30  
thromboembolic; monitoring of anticoagulant therapy in; Aug., 31  
viral; electron microscopy in rapid diagnosis of; Nov., 49  
viral; rapid diagnostic methods for; Nov., 13  
drugs  
anticoagulant; monitoring of;

# INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1982

- Aug., 31  
anticonvulsant and psychotropic therapeutic monitoring of; Feb., 45  
antidepressant; metabolites of; Feb., 47  
antipsychotic; therapeutic monitoring techniques for; Feb., 54  
as cause of hypercalcemia; July, 25  
effects of on dexamethasone suppression test for diagnosis of depression; April, 51  
effects of on plasma catecholamine assay results; June, 65  
effects of on cholinesterase levels in blood, April, 55  
nephelometric assays for; Sept., 38  
therapeutic; monitoring of; rapid system for; March, 57  
dysautonomia; familial; plasma norepinephrine levels in; June, 55
- E**  
*Early Detection of Potential Diabetes: The Problems and the Promise (Grave); (Book review); Feb., 56*  
electron microscopy  
immune; for recognition of antigen-antibody reactions; Nov., 51  
in rapid diagnosis of viral disease; Nov., 49; Nov., 64  
scanning; for detection of red-cell abnormalities in splenic dysfunction; Sept., 26  
electrophoresis  
agarose-gel; for creatine kinase (CK) isoenzyme resolution; Oct., 35  
counterimmuno- (CIEP); in diagnosis of bacterial meningitis; Oct., 17  
counterimmuno- (CIEP); in diagnosis of viral disease; Nov., 64  
immuno-; in evaluation of radiolabeling of hepatitis B surface antigen (HBsAg) for radioimmunoassay; Nov., 21  
in assay of creatine kinase (CK) isoenzymes; Oct., 25  
serum protein; in diagnosis of alpha-1-antitrypsin deficiency; July, 39  
serum protein; patient profiling with; Aug., 13  
two-dimensional; in human protein index; June, 32  
enhancement techniques; in electron microscopic investigation of viruses; Nov., 50
- Enterobacteriaceae; in differential diagnosis of non-cholera *Vibrio* infection; Aug., 45  
enzyme-linked immunoassay (ELISA); in rapid diagnosis of viral disease; Nov., 35  
enzyme-multiplied immunoassay technique (EMIT)  
in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 54  
with centrifugal analysis; in rapid therapeutic drug monitoring; March, 59  
*Escherichia coli*  
as an agent of neonatal meningitis; Oct., 17  
in urinary tract infection; April, 10
- F**  
factor VII; depletion of by warfarin; in therapeutic monitoring of oral anticoagulant drugs; Aug., 41  
factor Xa; inhibition of by low-molecular-weight preparations of heparin; Aug., 33  
factors; clotting; effect of heparin and antithrombin III on; Aug., 34  
factors; clotting; vitamin K-dependent; inhibition of in oral anticoagulant therapy; Aug., 40  
false-negative results  
as factor in disease prediction with mathematical methods; May, 24  
in CSF testing for bacterial meningitis; Oct., 18  
in dexamethasone suppression test for depressive illness; April, 50  
in vitamin B<sub>12</sub> assays; Feb., 35  
false-positive results  
as factor in disease prediction with mathematical methods; May, 24  
in antibody-coated bacteria (ACB) test for urinary tract infection; May, 19  
in dexamethasone suppression test for diagnosis of depression; April, 50  
sources of; in enzyme-linked immunoassays; Nov., 39  
fetal alcohol syndrome; effects of; and alcoholism; March, 43  
fibroblasts; cultured skin; in diagnosis of sphingolipid storage diseases; July, 32  
FRES<sup>®</sup>; formulation of; for red blood cell rejuvenation; Oct., 41
- G**  
gamma-aminobutyric acid; pathologic effect of in liver disease; Feb., 16  
genes; regulatory mechanisms of; and human protein index; June, 31  
genetic defects; in sphingolipid storage diseases; July, 27  
genetic engineering; role of human protein index in; June, 27  
genetics; of alpha-1-antitrypsin deficiency; July, 38  
glucocerebrosides; accumulation in sphingolipid storage disease; Feb., 16  
glucose-6-phosphate dehydrogenase deficiency; occurrence of red-cell Heinz bodies in; Sept., 26  
glucose-tolerance test (GTT); in diagnosis of diabetes mellitus; May, 46
- H**  
haptens; drugs as; in nephelometric inhibition assays; Sept., 38  
Health Care Finance Administration; role of in licensing and inspection of clinical laboratories; Oct., 47  
Heinz bodies; in red blood cell abnormalities; Sept., 26  
hematocrit; in hypercalcemic syndromes; July, 21  
hemoglobin  
glycosylated; as indicator of plasma glucose concentration in control of diabetes mellitus; May, 55  
concentration; in red blood cells; in red blood cell rejuvenation; Oct., 44  
*Hemophilus influenzae*; type b; as an agent of bacterial meningitis; Oct., 17  
heparin; therapeutic monitoring of; Aug., 31  
hepatitis  
non-A, non-B; serologic testing for; Aug., 23  
type B; immune globulin (HBIG) in prevention of; Aug., 23  
type B; surface antigen (HBsAg) coexisting with antibody in; March, 9  
types A and B; patient profiling of test results with computers; June, 15  
types A and B; radioimmunoassays in diagnosis of; Nov., 15  
types A and B; serologic testing for; Aug., 21
- herpes simplex virus (HSV); types I and II; rapid bacterial adsorption test for; Nov., 59  
high-performance liquid chromatography (HPLC)  
in therapeutic drug monitoring; March, 59  
in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 53  
histiocytosis X (eosinophilic granuloma); as a cause of diabetes insipidus; Jan., 25  
histology/cytology; in diagnosis of viral infection; Nov., 63  
Howell-Jolly bodies; in red blood cells; relationship with asplenia and defective splenic function; Sept., 27  
hypercalcemia  
calcitonin levels in; June, 43  
calcium metabolism in; July, 17  
familial hypercalciuric; parathyroid hormone concentration in; July, 20  
hypercalcitoninemia; differential diagnosis of; June, 43  
hyperparathyroidism  
free calcium concentration in; July, 17  
primary; urinary cyclic adenosine monophosphate (cAMP) levels in; July, 24  
hyperthyroidism; plasma catecholamine levels in; June, 61  
hypoparathyroidism; free calcium concentration in; July, 17  
hypotensive syndromes; plasma catecholamine levels in; June, 55  
hypothyroidism; plasma catecholamine levels in; June, 61
- I**  
immunoassay  
enzyme; for thyroxine and thyroid stimulating hormone; in neonatal screening for congenital hypothyroidism; Jan., 31  
enzyme; in antibody-coated bacteria (ACB) test for urinary tract infection; May, 18  
enzyme; in diagnosis of viral disease; Nov., 64  
enzyme; reverse-catch; for detection of herpes simplex virus antigen; Nov., 66  
enzyme-multiplied (EMIT); in rapid therapeutic drug monitoring system; March, 57  
enzyme-multiplied (EMIT); in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 54  
fluorescent; for antinuclear antibodies (ANA) in rheumat-

# INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1982

ic disease; March, 25  
 fluorescent; in therapeutic monitoring of anticonvulsant and psychotropic drugs; Feb., 54  
 immunoassays; nephelometric inhibition; principles and applications of; Sept., 36  
 immunodiffusion; electro-; in diagnosis of bacterial meningitis; Oct., 23  
 immunoglobulins  
   IgG; as components of intrinsic-factor-blocking antibody in pernicious anemia; Sept., 21  
   IgG; in hepatitis A and B; Aug., 21; Nov., 24  
   IgM; in hepatitis A and B; Aug., 21; Nov., 24  
   IgM; virus-specific; factors interfering in assays for; Nov., 66  
 index; human protein; June, 25  
 infarction; myocardial; creatine kinase (CK) isoenzyme patterns in; Oct., 25  
 infection  
   risk of; in asplenia and hyposplenia; Sept., 33  
   urinary tract (UTI); and asymptomatic bacteriuria; April, 11  
   urinary tract; antibody-coated bacteria (ACB) test for; May, 17  
   with non-*cholera Vibrio* species; diagnosis of; Aug., 43  
   insulin; assay for; value of in diabetes mellitus; May, 48  
 International Federation of Clinical Chemistry; reference method for gamma glutamyl transferase; May, 57

## J

jaundice  
   in hepatitis; Aug., 22  
   neonatal; in alpha-1-antitrypsin deficiency; July, 39  
 Joint Commission on Accreditation of Hospitals (JCAH); role in licensing and inspection of hospital laboratories; Oct., 49

## L

laboratory  
   cost calculation methods for; Feb., 23  
   data interpretation in; new techniques for; May, 23  
   functions of computers in; June, 14  
   inspections of; trends and prospects in; Oct., 46

personnel; performance of; effect of external events on; April, 65  
 reducing costs of microbiologic media in; Feb., 38  
 precautions for; in ethyl alcohol intoxication testing; March, 45  
 supervision; leadership skills program for; Sept., 46  
 lactic acid; cerebrospinal fluid (CSF) levels of; in bacterial meningitis; Oct., 18  
 lactic dehydrogenase (LDH) in patient profiling with serum protein electrophoresis; Aug., 13  
 isoenzymes; patterns of in bacterial meningitis; Oct., 19  
 lead; in blood; federal government criteria for assay of; March, 9  
 leadership skills; program for laboratory supervisors; Sept., 46  
 Lee-White clotting time; in therapeutic monitoring of heparin; Aug., 35  
 light scattering; as basis for nephelometry and turbidimetry; physical principles of; Sept., 34  
 lipids; in sphingolipid storage diseases; July, 29  
*Listeria monocytogenes*; as an agent of meningitis; Oct., 17  
 lymphocytes; proteins of; separation and identification of by two-dimensional electrophoresis; June, 25

## M

*Magnesium Deficiency in the Pathogenesis of Disease* (Seelig); (Book review); Feb., 55  
 marrow  
   biopsy of; plastic embedment techniques in; Jan., 40  
   disease of; Howell-Jolly bodies in red cells as indicators of; Sept., 31  
   transplantation of; autologous; new method for; Feb., 16  
 Medicare Act of 1966; effect on licensing and inspection of clinical laboratories; Oct., 47  
 meningitis; bacterial; diagnostic tests for; Oct., 17  
 4-methylumbelliferone; derivatives of; as substrates in enzymatic assays for the diagnosis of sphingolipid storage diseases; July, 30  
 microbiology; automated; types of instruments for; March, 32  
 microcomputers; in diagnostic

profiling of patients; June, 14  
 microscopy  
   electron; in rapid diagnosis of viral disease; Nov., 49  
   fluorescent; in antibody-coated bacteria (ACB) test for urinary tract infection; May, 18  
   in rapid bacterial adsorption test for herpes simplex virus infection; Nov., 60  
   interference phase-contrast; for detecting red-cell abnormalities in the evaluation of splenic function; Sept., 26  
 monitoring  
   automated electrical impedance; in diagnosis of asymptomatic bacteriuria; April, 10  
   of anticonvulsant and psychotropic drug levels; Feb., 45  
   of anticoagulant drugs; Aug., 31  
   of therapeutic drugs; rapid system for; March, 57  
 monoamine oxidase, in intraneuronal degradation of norepinephrine; June, 54  
 muscular dystrophy; creatine kinase (CK) MB isoenzyme in; Oct., 26  
 myocardial infarction; creatine kinase (CK) isoenzyme levels as indicators of; Oct., 27

## N

National Diabetes Data Group; classification of hyperglycemic disorders; May, 43  
*Neisseria meningitidis*; as an agent of bacterial meningitis; Oct., 17  
 nephelometry  
   in diagnosis of bacterial meningitis; Oct., 19  
   principles and clinical laboratory applications of; Sept., 34  
   rate; methods and applications in laboratory medicine; Sept., 39

## O

ornithinemia; neonatal screening for; Jan., 32  
 osmolality  
   plasma; measurement of in diagnosis of diabetes insipidus; Jan., 25  
   plasma/serum; for estimation of ethyl alcohol concentration; April, 28  
   urine; measurement of in diagnosis of diabetes insipidus; Jan., 25

## P

parathyroid hormone  
   C-terminal peptide of; radioimmunoassay for in hypercalcemia; July, 18  
   pathophysiologic effects of; in hypercalcemic syndromes; July, 17  
 paroxysmal nocturnal hemoglobinuria; cholinesterase enzyme levels in; April, 54  
 pathology  
   functions of computers in; June, 14  
   molecular; role of human protein index in; June, 26  
 pentagastrin; in provocative testing for thyroid medullary carcinoma; June, 39  
 personnel  
   laboratory; effect of external events on; April, 65  
   laboratory; role of in effective laboratory supervision; Sept., 46  
 phenotype studies; in alpha-1-antitrypsin deficiency; July, 38  
 phenylethanolamine-N-methyl transferase (PNMT); in radioenzymatic assay for plasma catecholamine levels; June, 62  
 phenylketonuria (PKU); screening for in newborn infants; Jan., 29  
 pheochromocytoma; as source of elevated calcitonin levels; June, 47  
 plasma catecholamine levels in; June, 59  
 phosphatase; alkaline; levels of; and levels of gamma glutamyl transferase in children; May, 58  
 phosphorus; and calcium metabolism; in hypercalcemic syndromes; July, 20  
 phosphotungstic acid; as stain in electron microscopic investigation of viruses; Nov., 50  
 photometry; light-scatter; in diagnosis of asymptomatic bacteriuria; April, 10  
 PIPA; formulation of; for red blood cell rejuvenation; Oct., 41  
 plasma; catecholamine levels in; diagnostic interpretation of; June, 54  
 platelets; testing of; in anticoagulation therapy; Aug., 34  
 pregnancy; diabetes in; diagnosis of; May, 47  
 problem-solving; by laboratory management and staff; systems for; Sept., 46  
*Problems in Breast Pathology.*

# INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1982

- Vol. II: Major Problems in Pathology* (Azzopardi); (Book review); Feb., 57
- profile  
diagnostic; computer-generation of; June, 15  
patient; based on serum protein electrophoresis patterns; Aug., 13
- protein  
C-reactive; assay for in diagnosis of bacterial meningitis; Oct., 18  
C-reactive; use in laboratory medicine; Sept., 17  
cerebrospinal fluid (CSF); levels of in bacterial meningitis; Oct., 18  
; VKA (protein induced by vitamin K absence or antagonist); in oral anticoagulation therapy; Aug., 41  
serum; electrophoresis of; in patient profiling; Aug., 13  
staphylococcal type A; as adsorption-purification agent in immunoassays for virus-specific IgM antibodies; Nov., 68  
staphylococcal type A; as binding agent in rapid bacterial adsorption test for herpes simplex virus infection; Nov., 59  
staphylococcal type A; as binding-agent in solid-phase radioimmunoassays for hepatitis A antibodies; Nov., 24
- proteins  
classical chemistry of; origins; June, 29  
human; index of; uses; June, 25  
mapping of; in human protein index; June, 26  
quantitation of; with nephelometric assays; Sept., 36  
*Proteus mirabilis*; in urinary tract infection; April, 10  
prothrombin ratio; in comparison of prothrombin-time test results; Aug., 41  
pseudoreplication technique; in electron microscopic diagnosis of viral disease; Nov., 51
- Q**  
quality control; cost of; in radioimmunoassay; May, 37
- R**  
R-protein; as factor in radioassays for vitamin B<sub>12</sub>; Feb., 32  
radioimmunoassay  
affinity solid-phase; for hepatitis B surface antigen (HBsAg); Nov., 29  
cortisol; in dexamethasone suppression test; Jan., 19; April, 43  
facilities for; cost determination of for laboratories; May, 35  
for calcitonin; in diagnosis of thyroid medullary carcinoma; June, 38  
for 17-hydroxyprogesterone; in neonatal screening for congenital adrenal hyperplasia; Jan., 34  
for immunoreactive trypsin (IRT); in neonatal screening for cystic fibrosis; Jan., 36  
for intrinsic-factor-blocking antibody in diagnosis of pernicious anemia; Sept., 20  
for parathyroid hormone; in diagnosis of hypercalcemia; July, 18  
for thyroxine (T4) levels; in screening for congenital hypothyroidism in newborns; Jan., 30  
in antibody-coated bacteria (ACB) test for urinary tract infection; potential utility of; April, 18  
in diagnosis of viral disease; Nov., 64  
in monitoring of anticonvulsant and psychotropic drugs; Feb., 51  
in rapid diagnosis of viral disease; Nov., 15  
solid-phase; for hepatitis B surface antigen (HBsAg); Nov., 21  
red blood cells; rejuvenation of in blood banking; procedures for; Oct., 38  
return on investment; calculation of for laboratory equipment; Feb., 24  
rheumatoid factor; IgM-class; as interfering agent in diagnostic testing for viral infection; Nov., 66  
rubella; IgG antibody in; enzyme-linked immunoassay (ELISA) for; Nov., 37
- S**  
screen; O'Sullivan; for gestational diabetes mellitus; May, 47  
screening  
for inborn errors in metabolism of newborns; Jan., 29  
genetic; for carriers of sphingolipid storage diseases; July, 32  
serologic; procedures for diagnosis of viral disease; Nov., 66  
serum-in-agar technique; in electron microscopic investigation of viral disease; Nov., 55
- Shy-Drager syndrome; plasma norepinephrine levels in; June, 59  
siderotic granules; detection of in red blood cells; Sept., 25  
Sjogren's syndrome; antinuclear antibody (ANA) assays in; March, 25  
spectrophotometers; in centrifugal analysis of therapeutic drugs; March, 59  
spectrophotometry; instruments for; in enzyme-linked immunoassays; Nov., 40  
sphingolipidoses; diagnosis of; July, 27  
spleen; functional evaluation of; Sept., 26  
sputum specimen preparation for electron microscopic examination of viruses; Nov., 51  
*Staphylococcus aureus*; as bacterial reagent in rapid diagnostic test for herpes simplex virus infection; Nov., 59  
*Staphylococcus epidermidis*; in urinary tract infection; April, 10  
*Streptococcus pneumoniae*; as an agent of meningitis; Oct., 17  
supervisors; laboratory; leadership skills development program for; Sept., 46  
systemic lupus erythematosus; antinuclear antibody testing in; March, 25
- T**  
test  
antibody-coated bacteria (ACB); for urinary tract infection; May, 17  
calcium-pentagastrin; in diagnosis of thyroid medullary carcinoma; June, 39  
Carter-Robbins; in diagnosis of diabetes insipidus; Jan., 25  
dexamethasone suppression; in diagnosis of depression; Jan., 19; April, 41  
glucose-tolerance; in diagnosis of diabetes mellitus; May, 46  
Hickey-Hare; in diagnosis of diabetes insipidus; Jan., 25  
McCaman-Robbins; in screening for phenylketonuria in newborns; Jan., 30  
meconium albumin; in neonatal screening for cystic fibrosis; Jan., 36  
pancreatic trypsin; filter-paper; in neonatal screening for cystic fibrosis; Jan., 36  
Schilling; for vitamin B<sub>12</sub> absorption; Sept., 17  
testing  
results of; predictive value; May, 24  
toxoplasmosis, rubella, cytomegalovirus, herpes virus (TORCH) series; enzyme-linked immunoassays in; Nov., 36
- tests  
clotting time; in therapeutic monitoring of heparin; Aug., 34  
for ethyl alcohol in blood; March, 43; April, 27  
for ethyl alcohol in breath specimens; March, 43  
provocative; in diagnosis of thyroid medullary carcinoma; June, 39  
screening; for bacterial meningitis; sensitivity and specificity of; Oct., 23  
therapeutic drug monitoring of anticonvulsant and psychotropic drugs; Feb., 45  
rapid system for; March, 57  
thrombin; effect of heparin on; in anticoagulation therapy; Aug., 33  
thyrotropin-releasing-hormone stimulation test; in diagnosis of psychiatric illness; Jan., 21  
time-series models; biologic; in laboratory diagnosis of disease; May, 28  
toxicity; of ethyl alcohol in blood; March, 43; April, 27  
transferase; gamma-glutamyl (GGT); function of and assay for; May, 56  
transfusion; blood and red blood cell rejuvenation; Oct., 40  
and transmission of hepatitis; Aug., 22  
trypsin; pancreatic; filter-paper test in neonatal screening for cystic fibrosis; Jan., 36  
tuberculosis; in differential diagnosis of bacterial meningitis; Oct., 19  
turbidimetry; physical principles of; Sept., 35
- U**  
ultracentrifugation; in specimen preparation for electron microscopic investigation for viral infection; Nov., 51  
United States Food and Drug Administration; role in licensing and inspection of blood banks; Oct., 48  
urea-cycle disorders; congenital; neonatal screening for; Jan., 32  
urine  
calcium concentration in; in familial hypercalciuric hypercalcemia; July, 21

electron microscopic examination of; in diagnosis of viral disease; Nov., 50  
glucose levels in; in diabetes mellitus; May, 48

## V

*Vibrio cholerae*; microbiologic and serologic characteristics; Aug., 43

*Vibrio* species; non-cholera; isolation and identification of; Aug., 43

## virus

hepatitis A; IgG and IgM antibodies to; radioimmunoassay for; Nov., 23

hepatitis A; serologic testing for; Aug., 21

hepatitis B; components of; radioimmunoassays for; Nov., 22

hepatitis B; serologic testing for; Aug., 21

herpes simplex types I and II; rapid bacterial adsorption test for; Nov., 59

viruses; electron microscopic recognition of; in diagnosis of viral disease; Nov., 50

vitamin B<sub>12</sub> absorption; testing for; Feb., 31

and intrinsic-factor-blocking antibody in diagnosis of pernicious anemia; Sept., 17  
assays; Feb., 31

vitamin D; in hypercalcemic syndromes; July 19

vitamin K-dependent clotting factors; inhibition of in oral anticoagulant therapy; Aug., 40

## X

x-ray system; filmless; Feb., 16

### Medical Technologist

## HEMATOLOGY SUPERVISOR

Challenging position for Medical Technologist (ASCP registered) with 3-5 years experience in Hematology. Areas of responsibility include: supervision, budgeting, purchasing and teaching. Experience with automation and quality control required. We offer excellent salary and fringe benefits package including tuition reimbursement. For consideration send resume along with salary requirements to: M.H. Montalvo, Senior Personnel Recruiter.

## TEMPLE UNIVERSITY HOSPITAL

3333 North Broad Street  
Philadelphia, PA 19140

Equal Opportunity Employer

# RELIABLE REFURBISHED

## COLEMAN LABORATORIES CORP.

helps you conserve capital with quality reconditioned laboratory and hospital equipment. **FOR SALE OR LEASE**

SMAC-Refurbished	\$119,999	ABBOTT VP	\$15,999
HPLC, Waters, Perkin Elmer, Varian	Inquire	GILFORD SYSTEM 5	\$5,750
IL-253 ATOMIC ABSORPTION	\$6,450	COULTER COUNTERS Fm, ZBI, ZF	Inquire
GILFORD 3500	\$5,999	DUPOINT ACA1 "as is"	\$6,999
GILFORD SYSTEM 4 COMPUTER	\$1,495	SMA II-C	\$73,950
IL-446 CO./CL	\$2,999	BECKMAN TR Rate Analyzer	\$1,500
AUTO ANALYZER II Dual Ch. W/Printer	\$7,999	SCANNING ELECTRON MICROSCOPES/1 year old	Inquire
BECKMAN CO./CO	\$2,999	AMSCO & CASTLE STERILIZERS	Inquire
IL 251 ATOMIC ABSORPTION	\$6,450	KDA micro sampling, refurb., 1 yr. warranty	\$44,999
IL 643/919/446	Inquire	SPECTROPHOTOMETERS FLUOROMETERS	Inquire
ABBOTT ABA 100 BASIC	\$6,950	FLAME PHOTOMETER Atomic absorption	Inquire
HYCEL-SUPER 17 "as is"	\$1,500	ULTRACENTRIFUGES Prep & Analytic	Inquire

## MEDICAL TECHNOLOGISTS

Bio-Science Laboratories, a leader in clinical diagnostic testing, has immediate evening and 3rd shift openings for Medical Technologists in the above areas.

These are bench level positions involved primarily with toxicological analyses using state-of-the-art techniques and equipment. Must satisfy state and federal license requirements.

Bio-Science Laboratories offers an attractive salary, excellent benefits package and career development opportunities.

For all locations, submit resume to

Bio-Science

Derek Baker
